

A. Fire-activity composites in raw units

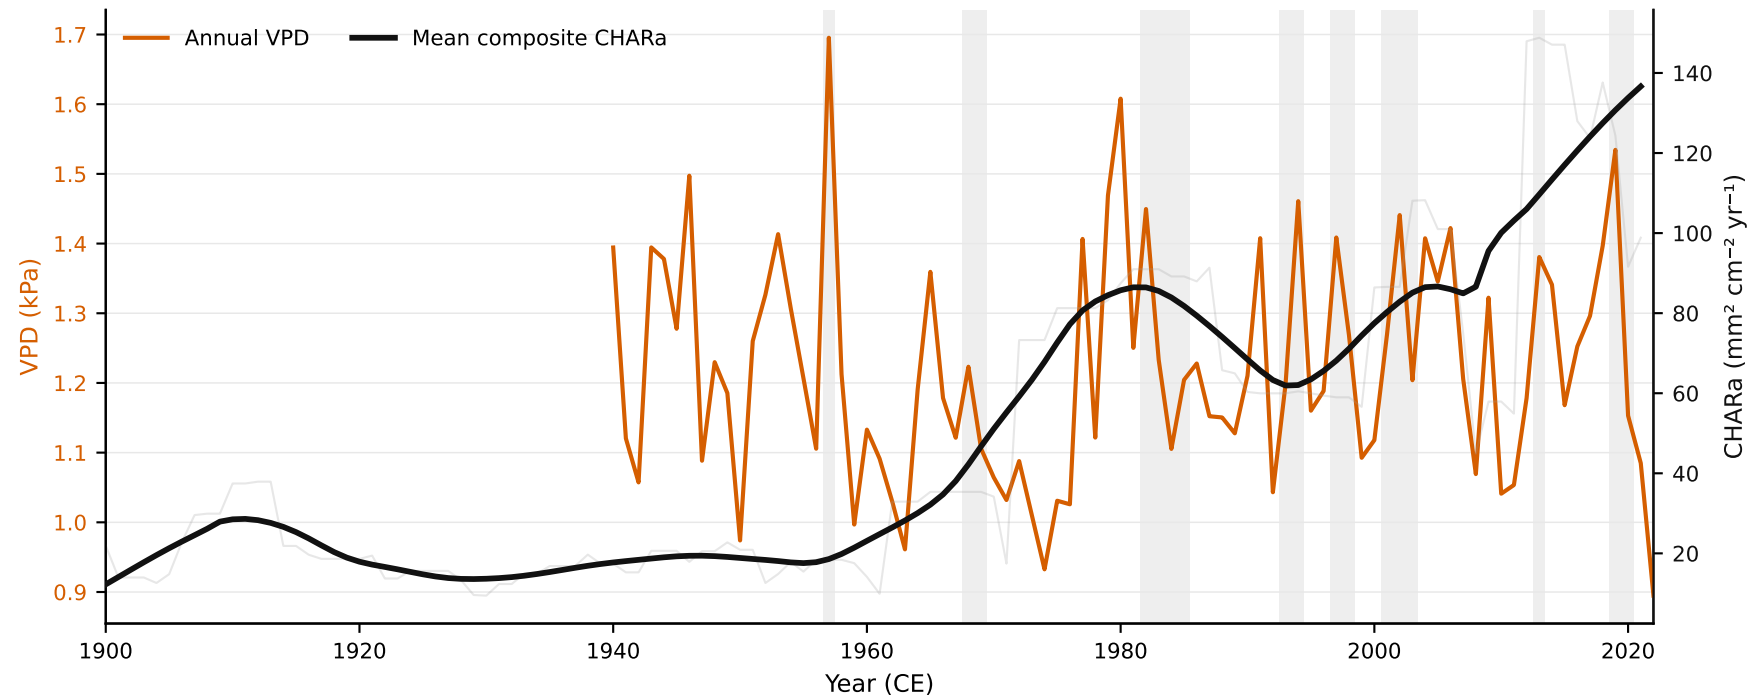

B. Raman-derived combustion conditions in raw units

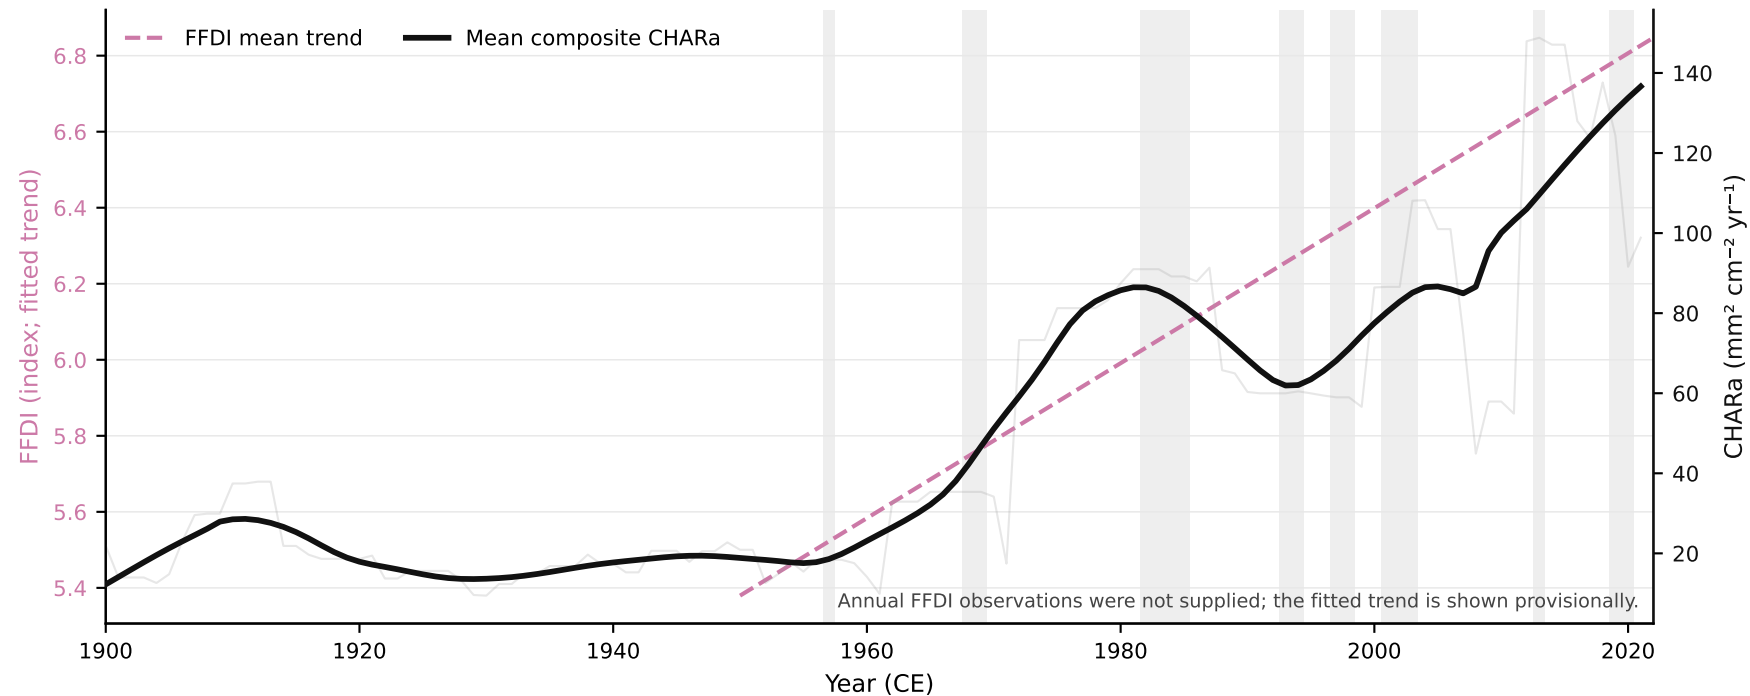

Rainfall-derived dryness and charcoal-producing fire activity

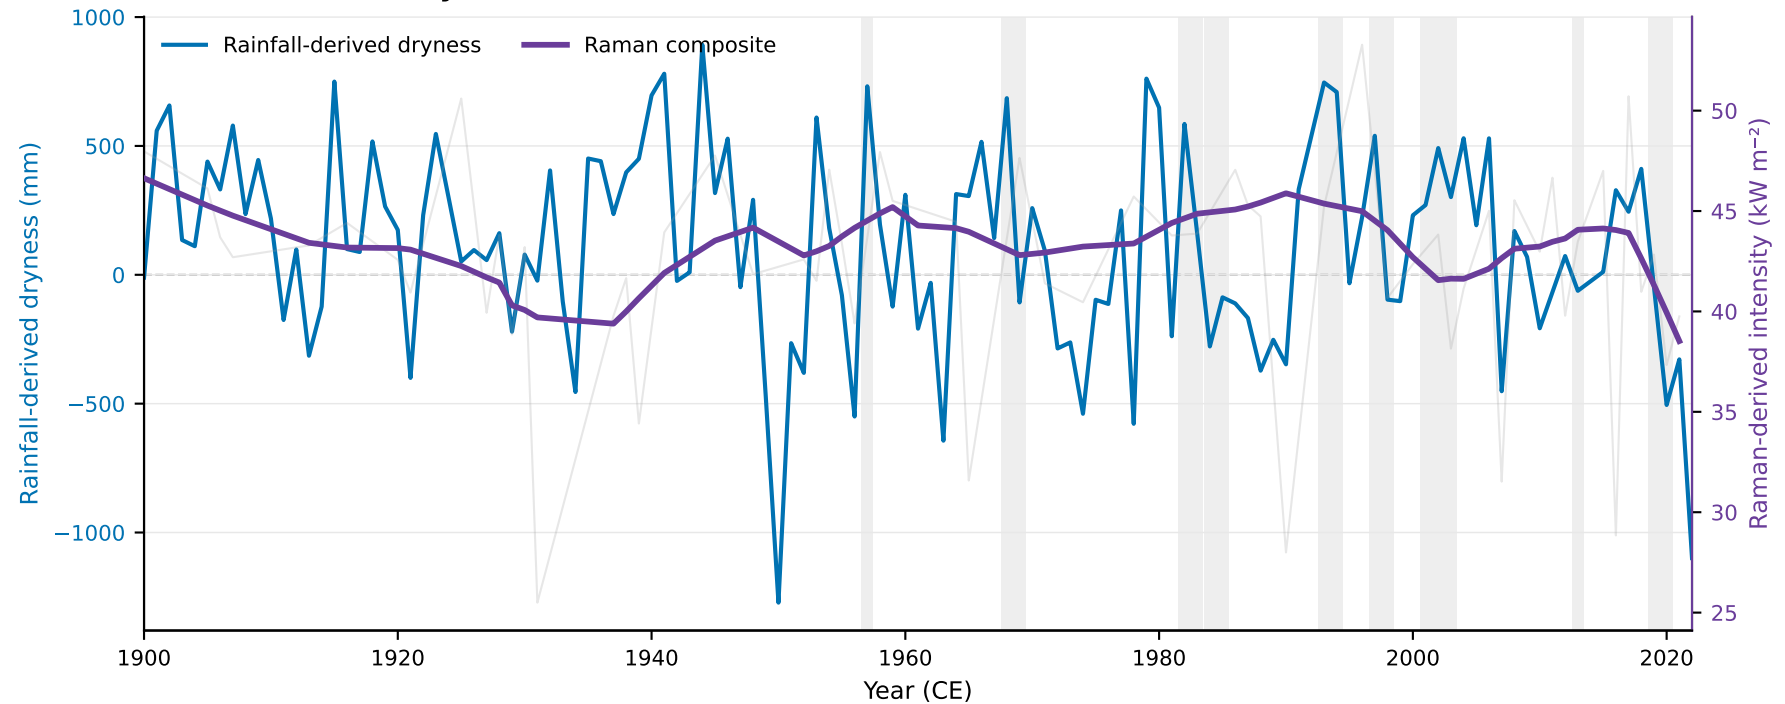

Vapour pressure deficit and charcoal-producing fire activity

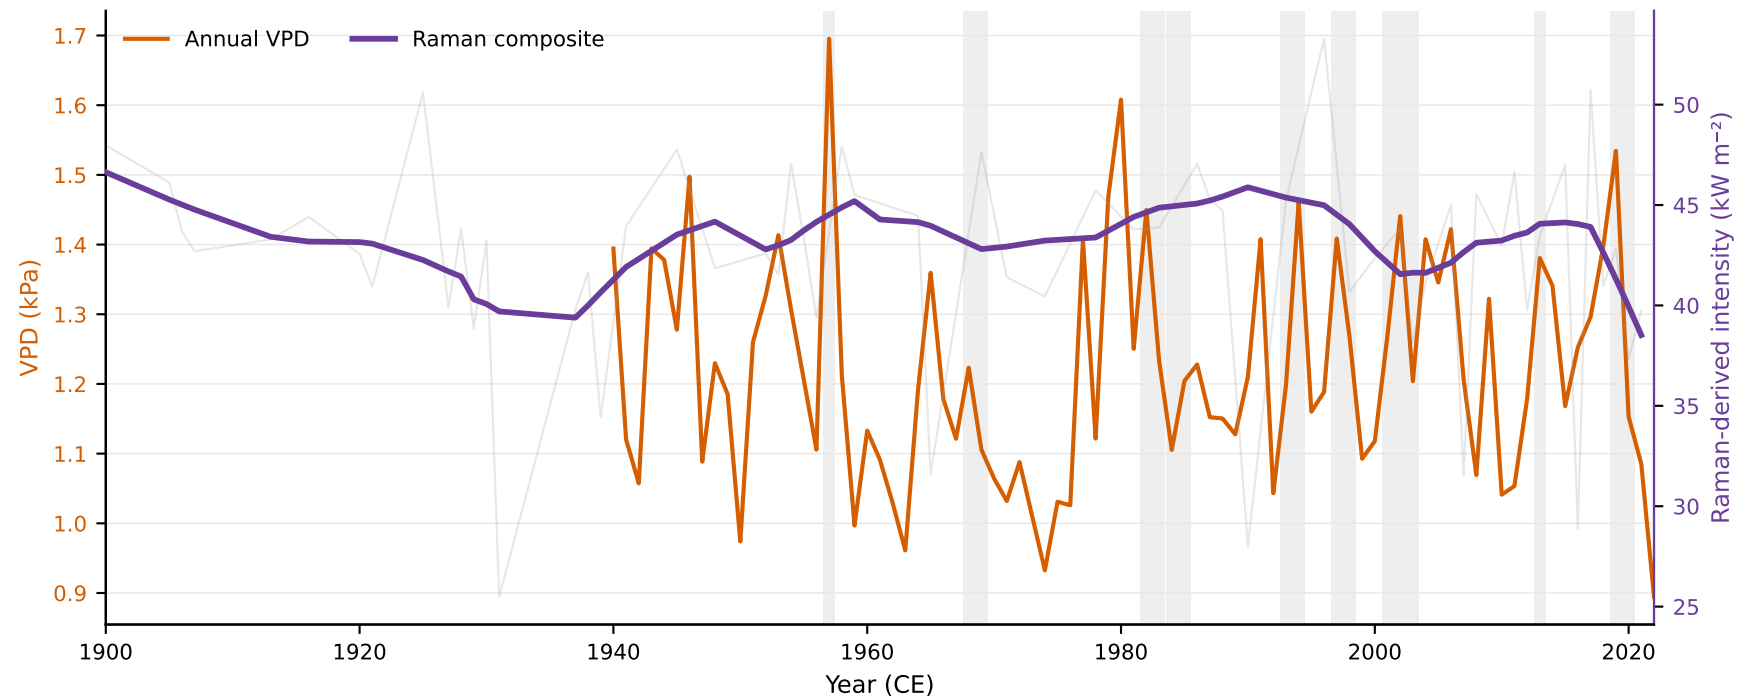

Forest Fire Danger Index trend and charcoal-producing fire activity

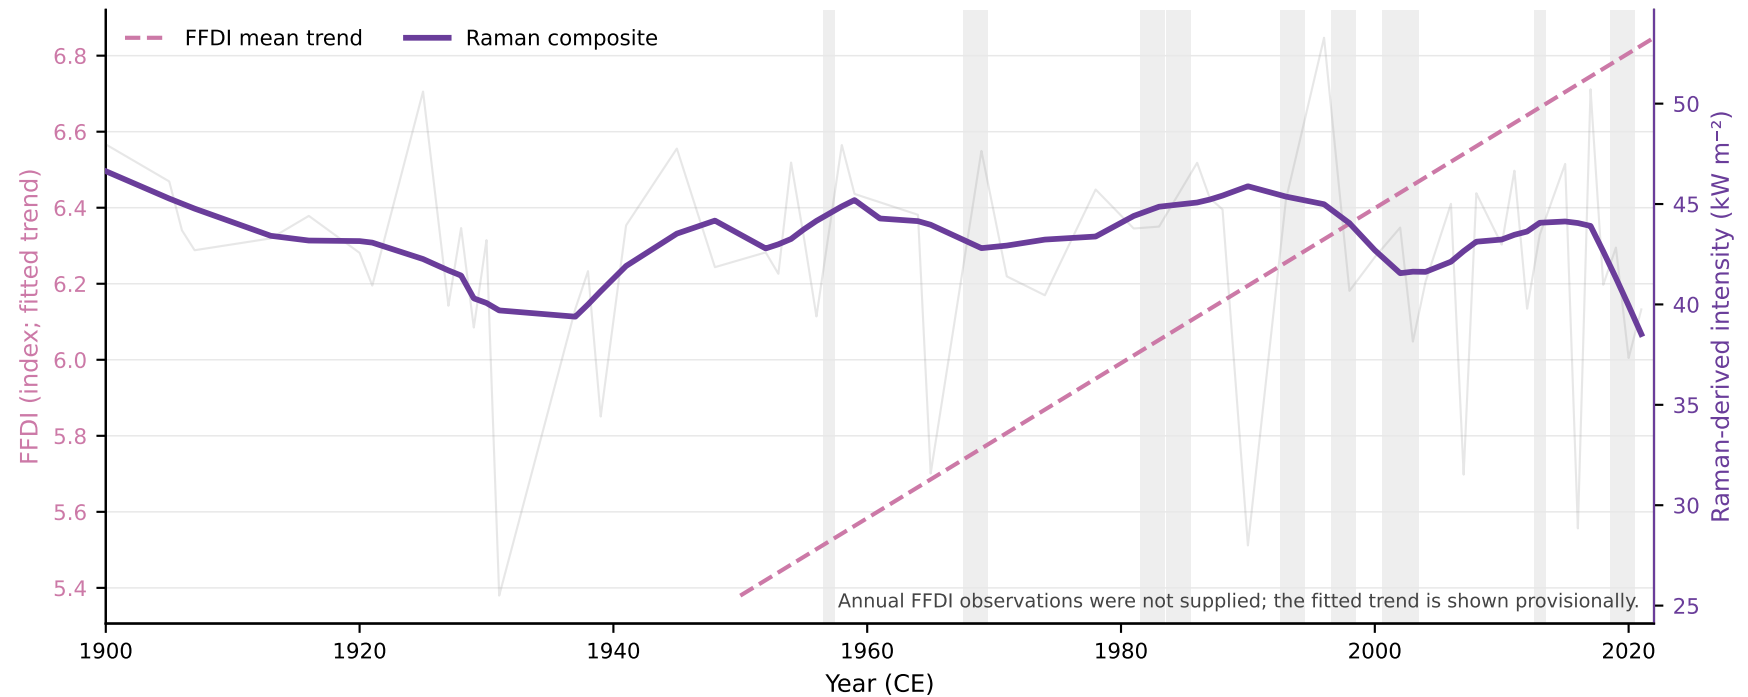

Rainfall-derived dryness and Raman-derived combustion conditions

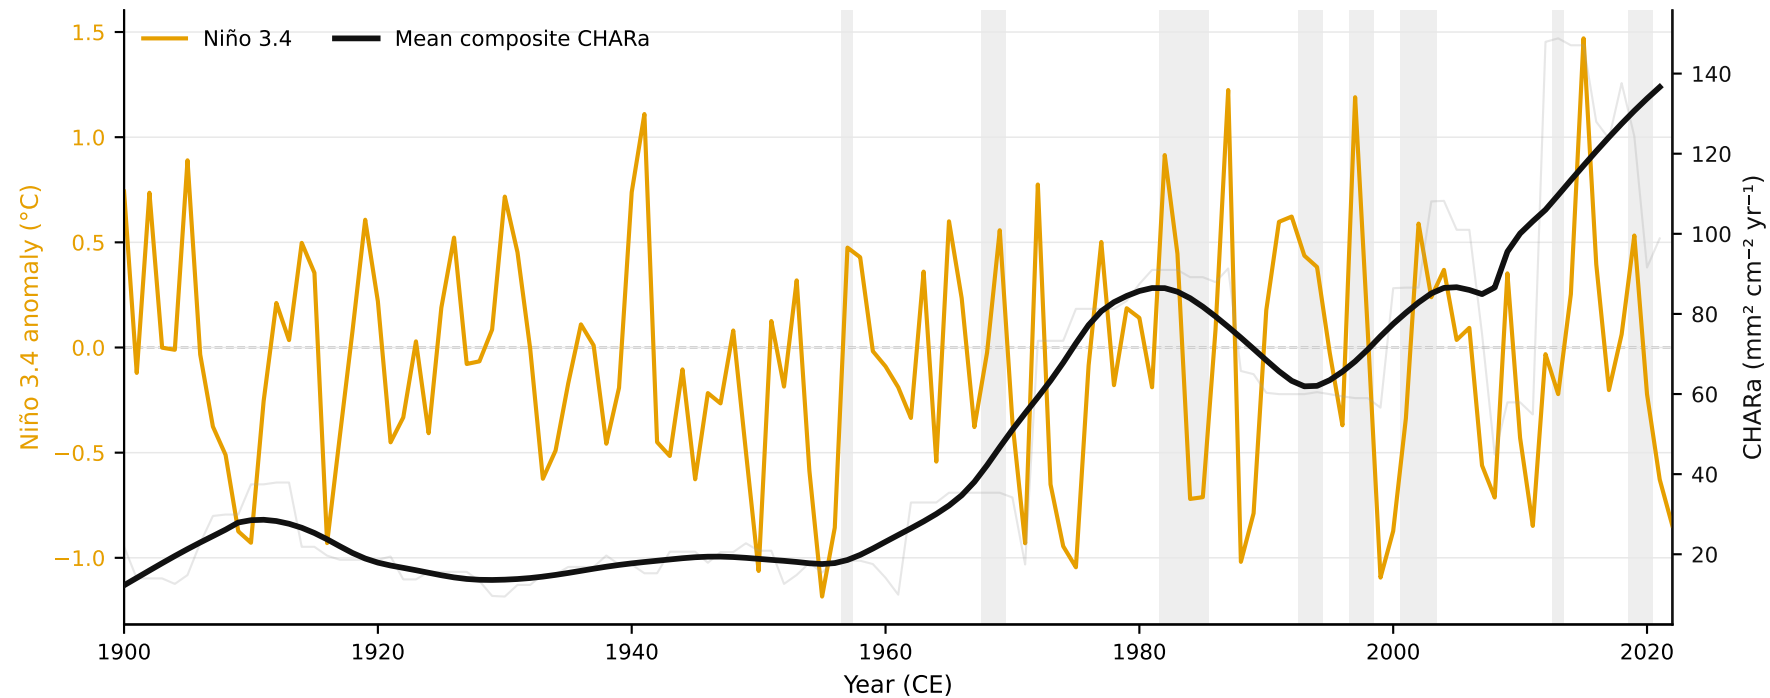

Vapour pressure deficit and Raman-derived combustion conditions

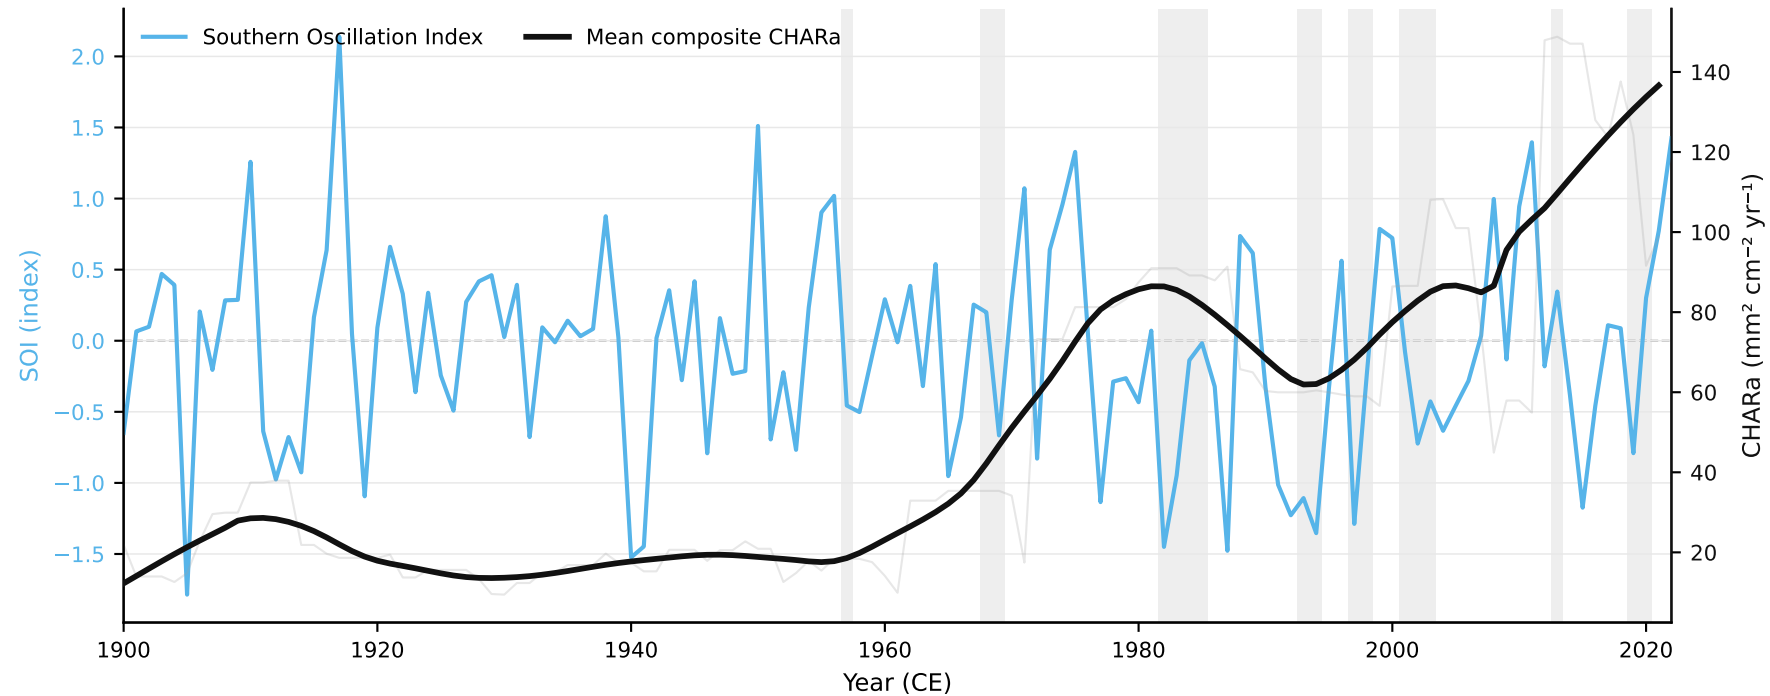

Forest Fire Danger Index trend and Raman-derived combustion conditions

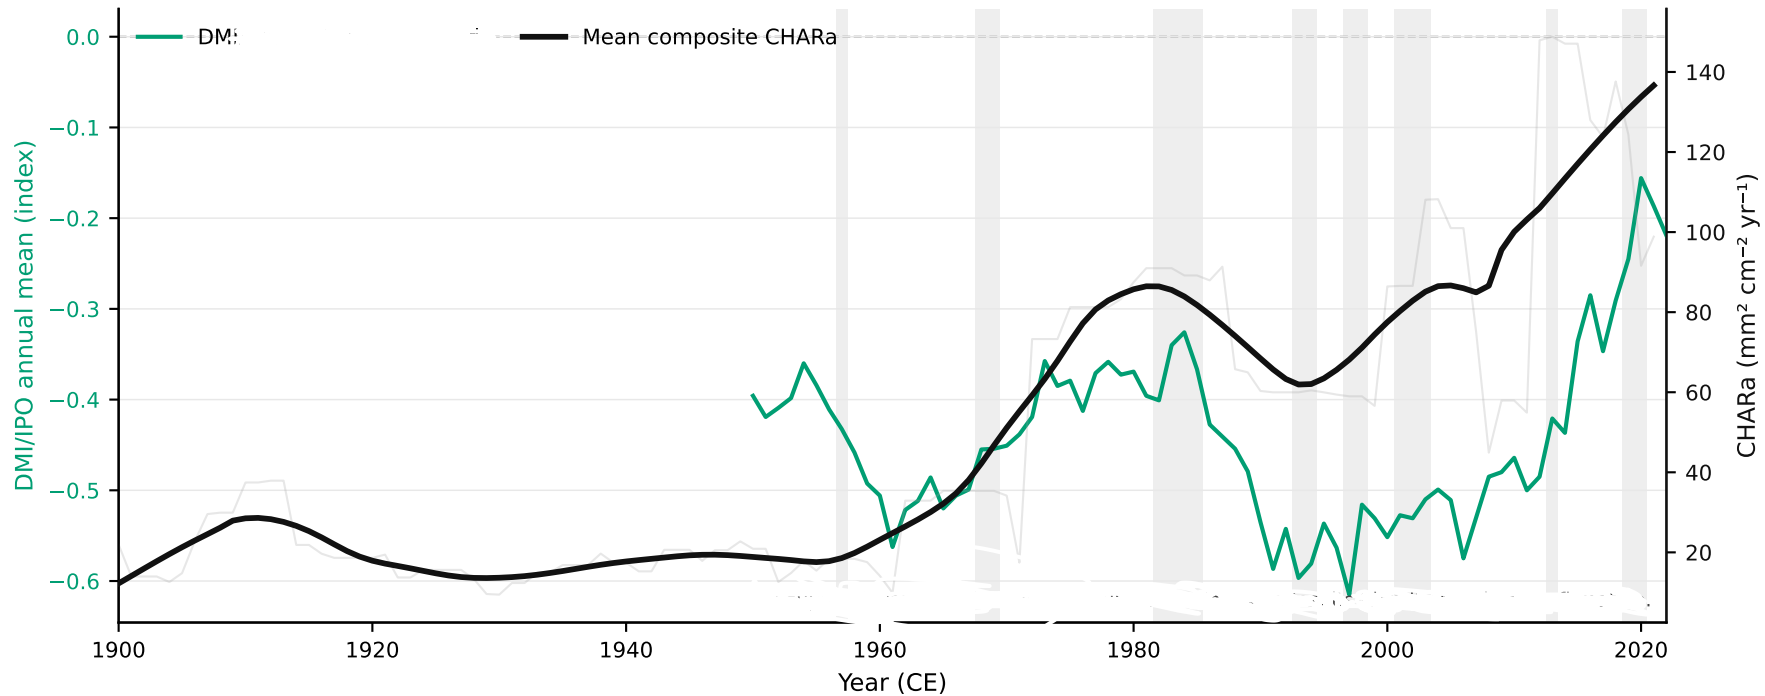

Niño 3.4 and charcoal-producing fire activity

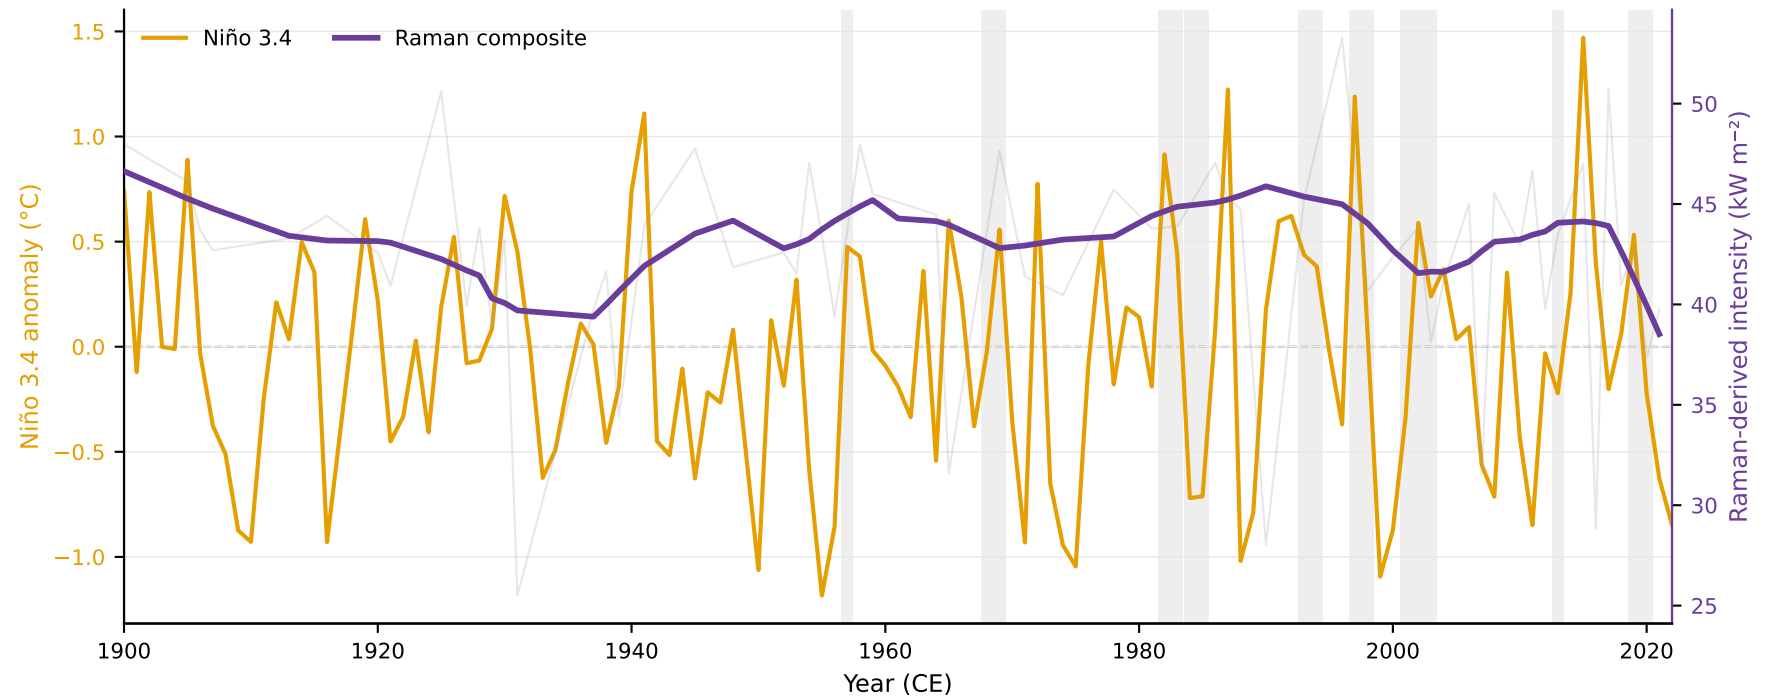

Southern Oscillation Index and charcoal-producing fire activity

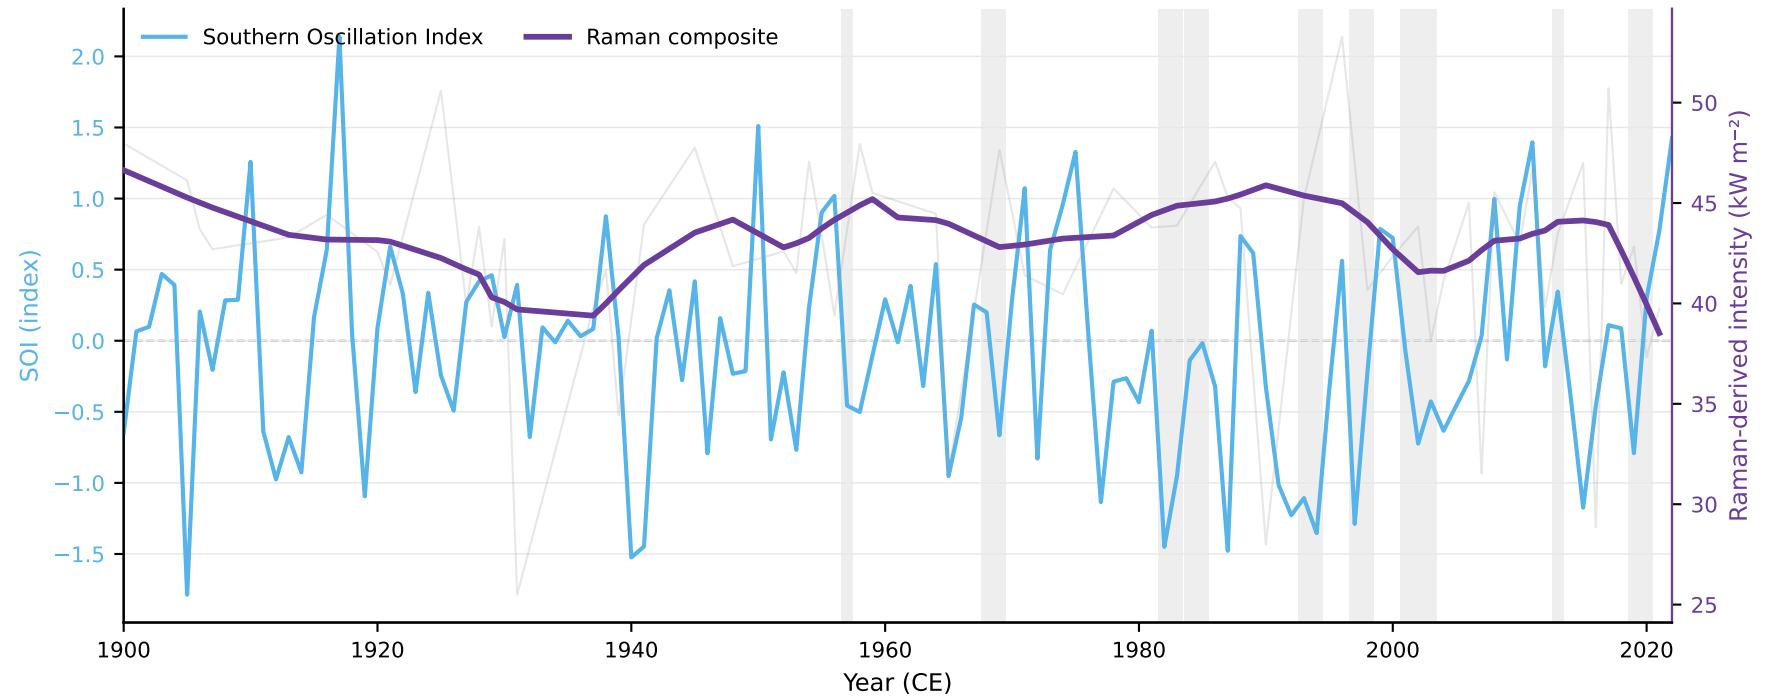

Indian-Pacific climate-index series and charcoal-producing fire activity

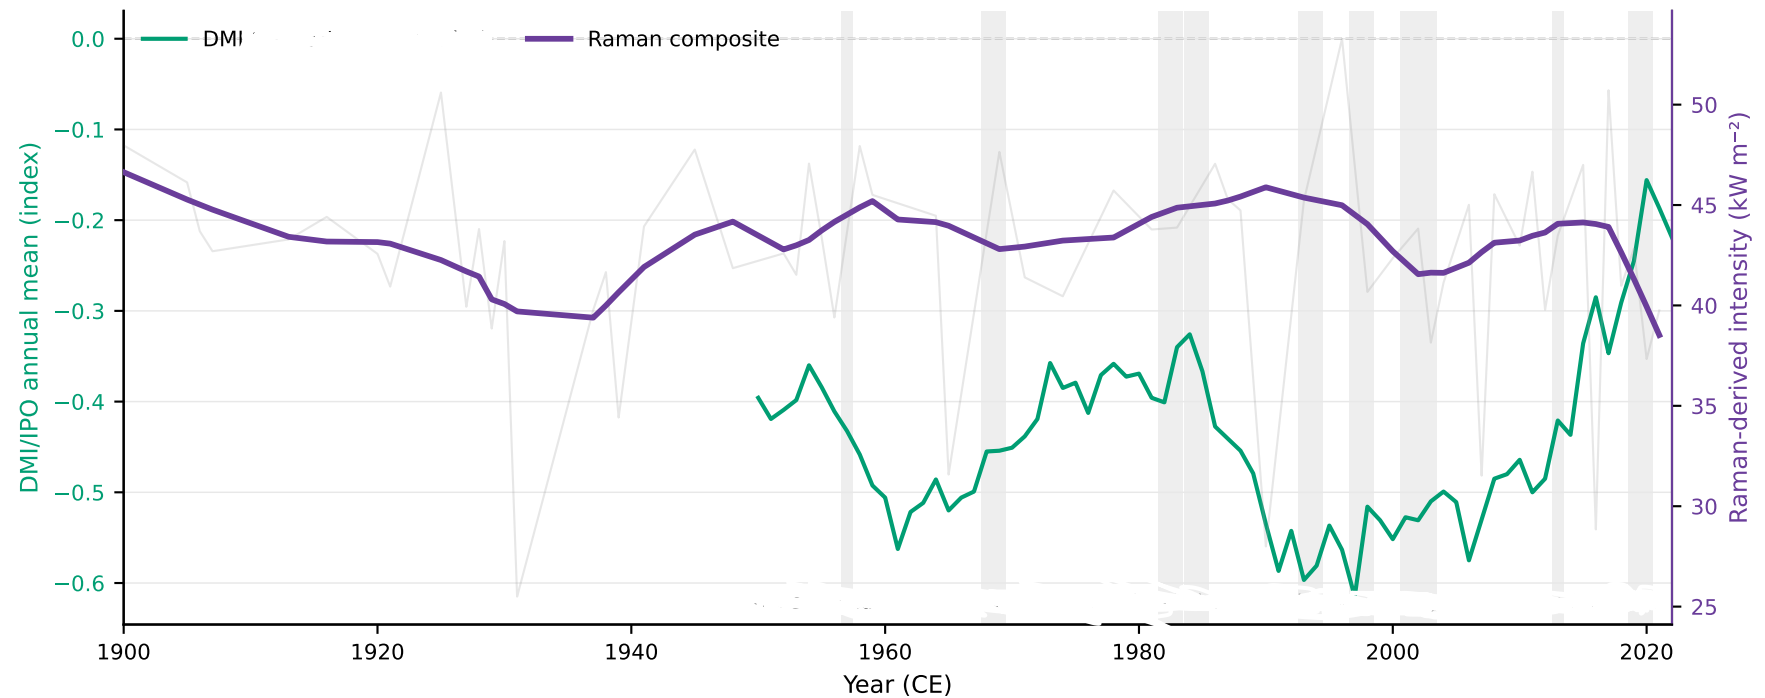

Niño 3.4 and Raman-derived combustion conditions

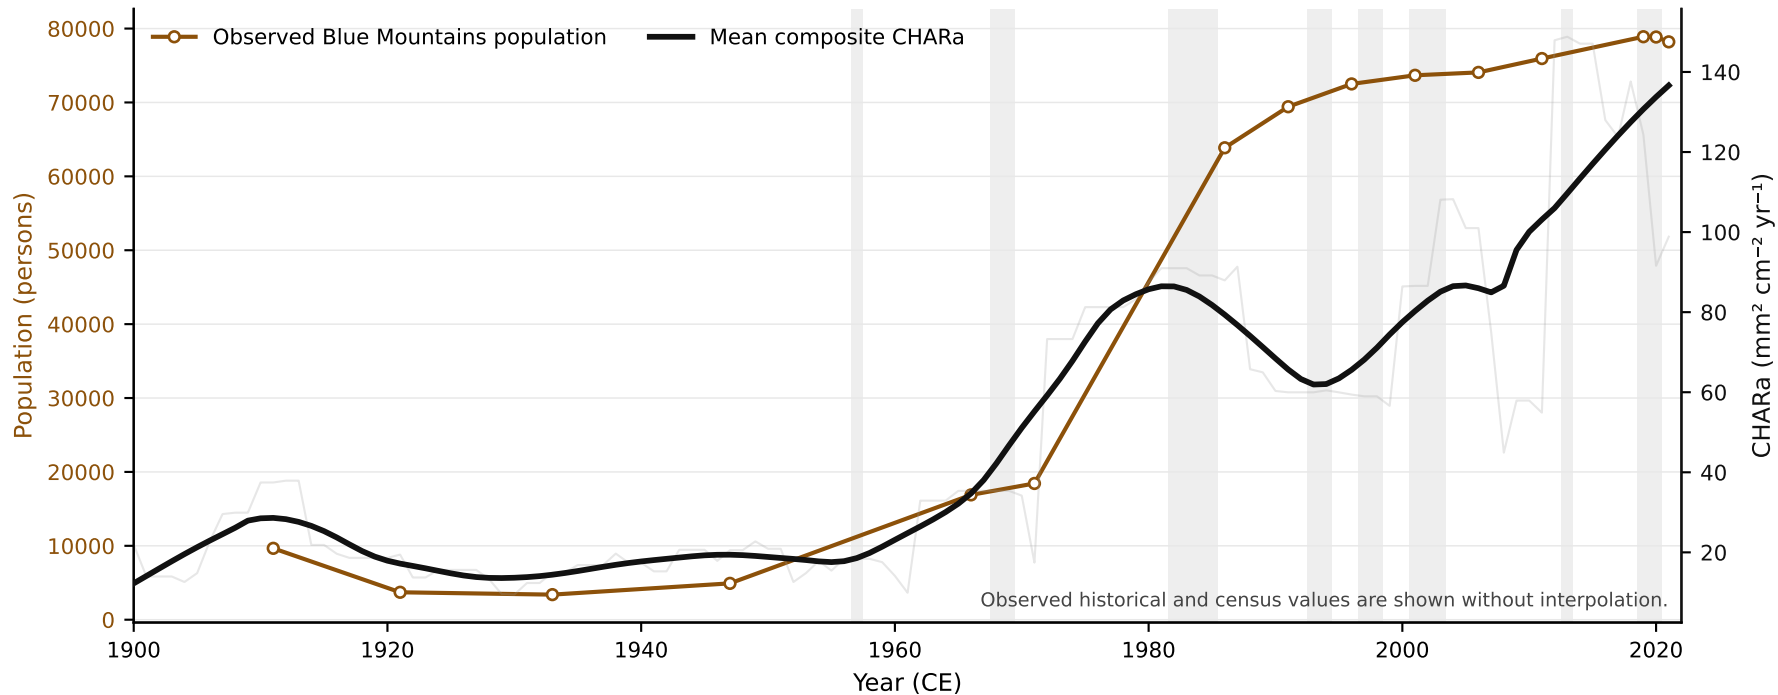

Southern Oscillation Index and Raman-derived combustion conditions

Indian-Pacific climate-index series and Raman-derived combustion conditions

Human presence and charcoal-producing fire activity

Human presence and Raman-derived combustion conditions
